

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-20. (cancelled).

21. (presently amended) An activity practice device, comprising:

a camera;

a housing having ~~swingably~~ hingeably attached first and second portions;

a display on said first portion for displaying real-time images received by said camera, said display being located in a plane substantially parallel to a simulated activity playing surface; and

an upper surface on said second portion upon which a user may stand while making a swing, said upper surface being substantially coplanar with said simulated activity playing surface; and

a striking target located substantially directly above a portion of said display, said target adapted to receive a golf ball thereon, said target being placed at a location, said location being such that a user, when focusing on said ball during the course of making a proper golf swing, is able to simultaneously see said swing in said user's peripheral vision.

22-24. (cancelled)

25. (previously presented) The device of claim 21 wherein at least a portion of said display is covered by a transparent protective covering.

DO NOT ENTER  
NPL 01/18/05

26. (previously presented) The device of claim 21 wherein the device is portable.

27. (cancelled)

28. (previously presented) The device of claim 21 wherein one of said first and second members includes a handle.

29. (previously presented) The device of claim 21 wherein said second member includes markings which suggest foot placement.

30. (previously presented) The device of claim 21 wherein one of said first and second members includes a recess for containing said camera.

31. (new) A portable device used for practicing a sport, said sport including an action swinging an elongated member by gripping said elongated member at one end and striking a projectile with another end, said device, comprising:

a camera;

a first portion of said portable device hingeably connected to a second portion of said portable device, said first portion supporting a display, said display used for displaying real-time images received by said camera, said second portion including an upper surface upon which a user may stand while making a swing;

a target on said device at which a user swings, said target being placed at a location such that a user, when focusing on said target during the course of a swing, is able to peripherally observe said swing in real-time.

32. (new) The device of claim 31 wherein said upper surface upon which a user may stand while making a swing is substantially level with a simulated playing surface created immediately above said display.

33. (cancelled)

34. (previously presented) The device of claim 31 wherein one of said first and second portions include a recess for containing at least said camera.

35. (presently amended) A device for teaching an activity to a user, said activity including swinging an elongated member by gripping said elongated member at one end and striking a projectile with another end, said device comprising:

a camera;

a display located in a first portion; said display having a substantially flat viewing area, said display capable of presenting images received from said camera in real-time onto display enabling the user to simultaneously view themselves while engaging in said activity;

a projectile-receiving striking surface which is substantially parallel to and located above said flat viewing area enabling the user to hit said projectile off of said striking surface and then observe a projectile response to said activity via said display; and

a simulated playing surface located on a second portion, said simulated playing surface being substantially parallel to said viewing area and said striking surface.

36. (previously presented) The device of claim 35 in which the substantially flat viewing area is embedded in a simulated sport playing surface.

37. (cancelled)
